

SOLAR PANEL

Valen Panel Bracket

Manufactured to ensure maximum efficiency, the Valen Solar Panel Bracket has the ability to install at the appropriate angle for your location. The Valen Solar Panel Brackets are hot dip galvanised to extend durability. In order to make shipping easier and more economical, the brackets are packaged as a kit with the 2 cross arms detached from the main frame. By bolting the cross arms to the main bracket frame, time spent on site is minimised. Valen Solar Panel Brackets are wind rated to Wind Region A, Terrain 2, 3, or 4 in accordance with AS1170.2. Further sizes are available on request, as well as quad, dual and ground mounts.
